

## PRESS RELEASE

Azkoitia, September 16, 2019

### **The German Minister of Transport and Digital Infrastructure highlights JUARISTI's innovations in his visit to the company's stand at EMO**

- The Basque Minister of Economic Development and Infrastructure, Arantxa Tapia, and representatives of JUARISTI received a delegation of German authorities and businessmen, headed by Minister Scheuer, who were interested in the company's latest developments.
- The Gipuzkoan machine tool company is showing to be one of the most prominent in the EMO fair thanks to its latest innovations, especially its new intelligent machining center.

Andreas Scheuer, Federal Minister of Transportation and Digital Infrastructure, today praised JUARISTI's latest technological developments in his visit to the company's stand at the EMO fair in Hannover. The minister himself and his team selected JUARISTI to visit among more than 2,200 exhibitors of the fair in recognition of the strong innovation component of the developments presented by the company in this edition. The Basque Minister of Economic Development and Infrastructure, Arantxa Tapia, was with the company's representatives in its reception of the minister, setting JUARISTI as an example of the Basque industrial enterprise paradigm with its strong international presence and technological leadership in its sector.

The minister's distinction at the EMO fair, a world reference in the metal industry, which this year expects to welcome more than 100,000 visitors from more than 50 countries, is an important boost to a business project characterized by technological leadership, its boost to innovation and digital transformation efforts applied to the machine tool sector.

In this edition, JUARISTI presents a new intelligent multifunction machining center with an advanced design and a new range of universal heads that have a magnificent speed and power ratio, which results in high productivity in 5-axis machining. In addition, the company has informed its customers of the benefits of its new advanced production center, the Accuracy Cube, and its new comprehensive service offering.

Other authorities and representatives from the Spanish and German industry also attended the JUARISTI stand, including Stephan Weil, Minister President of Lower Saxony, Adel Al-Saleh, member of the Board of Directors of Deutsche Telekom, Dr. Rolan Feichtl, President of CECIMO and Carl Martin Welcker, general commissioner of EMO.

## **About JUARISTI**

JUARISTI, experts in manufacturing milling and boring solutions and multifunction centers, has been a reference in the machine tool sector for 80 years. Its headquarters are located in Azkoitia (Basque Country) and its product range covers all configurations of milling machines, boring machines and multitasking centers.

The company is recognized in its sector for the quality and robustness of its products, high productivity and its close cooperation with its customers, starting with advice in the purchase phase to any future technical service, along with the development of innovations that represent a differential value to compete globally.

The JUARISTI technical service network is present in more than 40 countries. The response speed, the availability of spare parts and the high professional level of its technical staff, allows them to offer a personalized and professional service that ensures the reliability of their solutions.

Constantly analysing the market and listening to its customers' needs has shaped the foundation of JUARISTI's strategy for the next few years, which we can sum up with the CAST concept: Connectivity, Automation, Service and Technology; the 4 strategic areas in which it will concentrate its efforts in the upcoming years.

Last year, the company closed with a record number of new orders estimated at 46 million euros. In addition, in 2018 JUARISTI registered a 25% growth over the previous year and in 2019 it expects to exceed 35 million euros in turnover.
