LACH DIAMANT presents at GrindTec Augsburg – Hall 1, Stand 1076
Dressing and Profiling of Grinding Wheels

The LACH DIAMANT Programme from Tradition to Progress

Following its tradition still today LACH DIAMANT offers service for setting single-point dressing diamonds and regrinding of profile diamonds – “We owe this to our customers”, emphasize the managing directors who are looking back to an almost 100-year anniversary; while they also reaffirm that “Purchasing diamonds is a matter of trust.”

The traditional product range for the dressing of grinding wheels includes not only single-point dressers (e. g. the Diaform® chisel) but also sintered multi-point diamond dressers and aggregates.

By now, the special “Future for Today – Tools” product segment features the internationally well established »Dia-Fliese-perfect« on the top of the list, closely followed by »drebojet-plus«, the alternative diamond dressing roll system for the CNC-controlled dressing/profiling of conventional and CBN grinding wheels.

The product line for dressing and profiling grinding wheels is completed by the »rotary-dress« diamond dressing rolls, negatively

manufactured. In this context, LACH DIAMANT gladly refers to the success and technical know-how of LACH-Form GmbH & Co. Diamond Engineering KG, founded in the mid 80s.

One more reason to visit LACH DIAMANT with almost 100-years of tradition at GrindTec from March 18th to March 21st, 2020 in hall 1 at stand 1076.
