

EMO Hannover 2023 – World Tour – London Press Conference Review

Kyocera SGS Precision Tools Europe were delighted to be invited to be the UK exhibitor panellist at the EMO2023 World Tour Press Conference in London on 23rd May 2023.

Speaking to the invited audience from the UK's leading trade journalists from the full spectrum of manufacturing sectors at The Pullman Hotel, Hugh Welch, European Managing Director of Kyocera SGS shared insights and experiences of participating in this prestigious global event. Joined by Dr. Wilfried Schäfer, Executive Director, VDW, Christian Pfeiffer, Senior Vice President, Deutsche Messe AG and James Selka, CEO of MTA, together they presented the innovations being premiered at the show this year.

A Long History with EMO

Having exhibited at every EMO since 1985, Kyocera SGS's participation at this globally recognised show has been a significant contributor to their success, enabling them to meet new and current customers, as well as establish themselves as thought leaders in the industry.

The plans for this year

At the upcoming exhibiting EMO23 in September 2023, Kyocera SGS will be showcasing the most innovative solid carbide cutting tool solutions on their stand. In addition, at this year's show they will be featuring some incredible air frame and disc components on our stand thanks to the AMRC & NCMT. From our colleagues at MSC, we will have a jet engine on display so we can demonstrate where components are located within the engine and the differences that our tools make on the discs and blades.

Kyocera SGS are extremely pleased to announce that Mazak will be demonstrating their patented Bulb Tools process on their stand at EMO23, which will showcase how this operation has provided a step change for their OEM Fan Disc manufacturers customers.

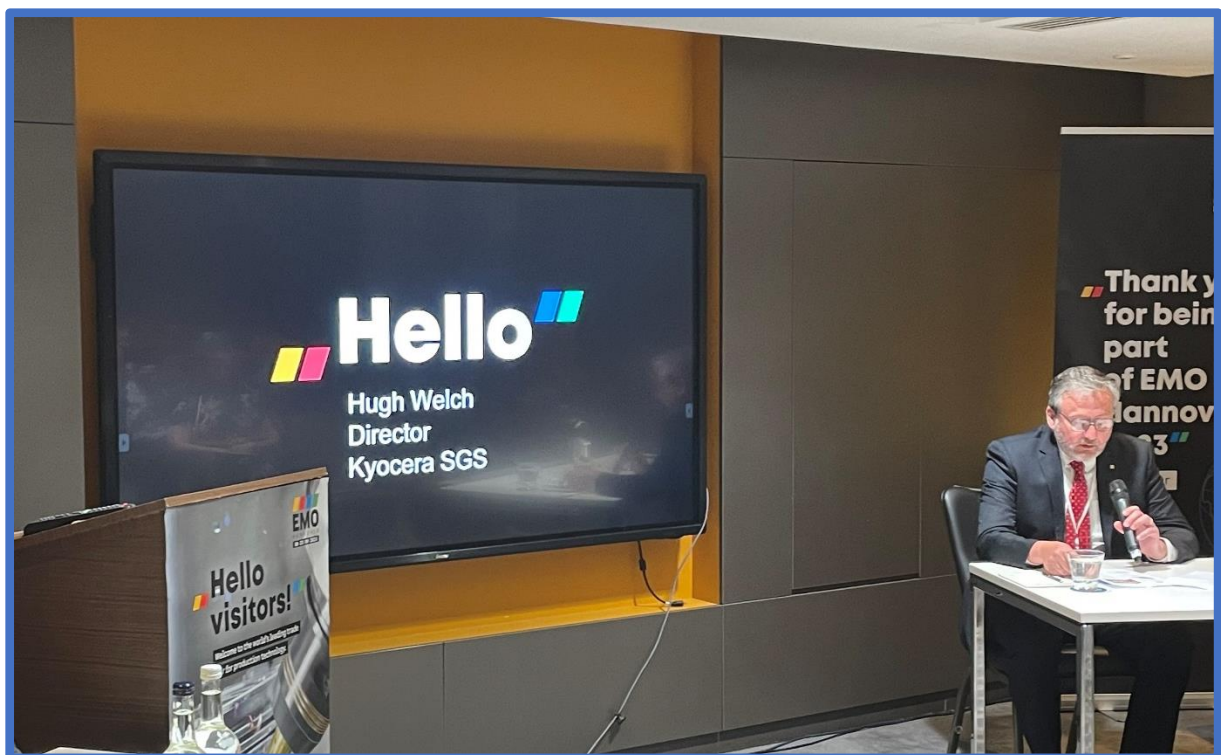

Extra services on offer

Kyovera SGS also have created a bespoke micro site where our guests and customers can get all the information they might need ahead of the show and also learn how they can attend, who they will meet and all the facilities at the Hannover Messe. Including how to enter their competition to win a trip to our prestigious US Tool Clinic in October in Ohio.

Valuable relationships and more

There can be no doubt that exhibiting at EMO Hannover since 1985 has been a valuable investment for Kyocera SGS Precision Tools Europe Ltd. It has allowed them to deepen our relationships with their European customers, showcase their cutting-edge technologies to the world and stay up-to-date with the very latest industry developments.

They look forward to continuing to exhibit at EMO Hannover in the years to come and to further strengthen their position as a leader in the precision tool manufacturing industry at the show in September and at their 40th anniversary show in 2025!

Notes for editors:

Kyocera SGS Precision Tools Europe Ltd is a marketing leading manufacturer of solid carbide cutting tools. Producing the highest quality cutting tools to the aerospace, medical and power generation sectors, including specialist and bespoke tool solutions to improve production efficiency, cycle times and profitability of manufacture.
