

**Meister Abrasives and Alfons Schmeier as official exhibitors at the  
premier international trade fair for grinding technology GrindingHub**

*Zürich, Switzerland, March 14, 2024* – Swiss superabrasives leader Meister Abrasives AG and German precision grinding expert Schleifscheibenfabrik Alfons Schmeier GmbH & Co. KG announce their participation in the international grinding trade fair GrindingHub in May 2024.

Swiss company Meister Abrasives and its German sister company Alfons Schmeier will once again participate together as official exhibitors at the second edition of GrindingHub. The fair, which will take place in May 14-17, 2024 at Messe Stuttgart, Germany is the international platform for industry experts to discuss new technologies, products, and innovations in the field of grinding technology. Meister Abrasives and Alfons Schmeier will present their technological innovations and future projects in the field of grinding and finishing solutions.

With its unparalleled expertise, Meister Abrasives turns its innovations in ceramic and hybrid bonds with CBN and diamond grits into industry-wide benchmarks. Expert in precision and fine grinding, Alfons Schmeier continuously optimizes its offering by developing innovative solutions, such as the sulfur-free honing cups and honing stones, which are not only beneficial for machines and people, but also achieve a better tool life than conventional, sulfurized honing tools. The innovative technologies employed in all Meister Abrasives' and Alfons Schmeier's solutions are constantly driving forward future-oriented developments in the automotive, e-mobility, semiconductor, medical, bearing and surface coating industries. During GrindingHub, Meister Abrasives and Alfons Schmeier will present their latest developments in the field of double disc fine grinding and grinding of hard materials, as well as solutions for the medical and e-mobility industries.

Visit Meister Abrasives' and Alfons Schmeier's pavilion – Hall 9, booth 9D71 – to discover their latest innovations and personally meet the brands' experts.

#### ABOUT MEISTER ABRASIVES

Meister Abrasives is a leading and highly innovative company with extensive experience in developing and manufacturing customized cutting-edge industrial superabrasive tools for high-precision grinding applications. Founded in 1951 in Switzerland, Meister Abrasives is synonymous to exceptional quality, precision, and individualized customer solutions – values inherent not only to the brand but also to the land in which it originated – Switzerland. Being at the forefront of technological innovation, Meister Abrasives is dedicated to its quest of creating innovation with a higher meaning through processes optimization, sustainable use of resources, control of own manufacturing processes, and uncompromising attitude to quality in customer care, facilitated by the brand's international structure with family values.

#### ABOUT ALFONS SCHMEIER

Founded in 1946 in Helmbrechts, Germany, Alfons Schmeier is an innovative company, leader in grinding technology with extensive expertise in developing and manufacturing customized high-precision tools for internal grinding and superfinishing that optimize the most demanding grinding processes. The Alfons Schmeier name evokes the brand's values of highest precision, exceptional quality, and individualized customer solutions.

## ABOUT GRINDING HUB

After its successful premiere in 2022, GrindingHub has undoubtedly become the new hub of grinding technology bringing together grinding experts from all over the world. With its clear focus, global approach and hybrid trade fair concept, GrindingHub is the industry meeting place for grinding technology – from the industry for the industry. Organized by the German Machine Tool Builders' Association (VDW), in cooperation with Messe Stuttgart and the Swiss Association of Mechanical and Electrical Engineering Industries (SWISSMEM), GrindingHub combines extensive industry expertise, a global network of contacts, and a wealth of trade fair experience.

Under the motto "Brings solutions to the surface", GrindingHub showcases solutions along the entire value chain. Industry sectors, among which grinding, polishing and honing agents, grinding machines for cutting and machining tools, disposal and treatment of cooling lubricants, and surface grinding machines, will be spotlighted. During the trade fair, topics such as Technology, Processes, Productivity, Automation and Digitalization in Grinding Technology will be discussed in order to demonstrate how science and industry can work hand-in-hand together.
